Opt In or Opt Out of the New Hampshire Immunization Information System

What is the NHIS?

New Hampshire Immunization Information System (NHIS), is a secure (HIPAA compliant), web-based system that consolidates a patient's vaccine information from multiple healthcare providers into a single reliable record. Every state in the U.S., along with some large cities, has its own immunization information system.

Benefits of NHIS for the Public:

Healthcare providers have quick and easy access to immunization records when needed (e.g. Emergency rooms, schools, licensed childcare centers, and/or camp entry requirement).

Security

NHIS was designed with multiple security controls in place to protect immunization information and patient confidentiality.

Choose to Opt In or Out of the NH Immunization Information System

Parents of child under 18:

- I choose to have my child participate in NHIS (*recommended by Concord Pediatrics*)
 I choose not to have my child participate in NHIS

Patients (over 18):

- I choose to participate in NHIS (*recommended by Concord Pediatrics*)
 I choose not to participate in NHIS
