

Concord Pediatrics Vaccine Policy

Our preventative care includes guidance on growth and development including adhering to the immunization guidelines recommended by the American Academy of Pediatrics (AAP) and the Centers for Disease Control and Prevention (CDC). You can find this schedule displayed in our office, on our website, or by visiting:

<https://www.cdc.gov/vaccines/hcp/imz-schedules/child-adolescent-age.html>

To ensure that we provide optimal care to our patients and promote the safety and well-being of all individuals at our practice, we require our patients to receive the recommended vaccinations on schedule.

Vaccines are safe and effective in preventing diseases and keeping kids healthy. They prevent diseases that cause real harm.

We understand that some parents may have questions regarding vaccinations, and we respect that every parent tries to do what is best for their child. You can find helpful information at the following links:
